

**SOUTH SEMINOLE & NORTH ORANGE COUNTY
WASTEWATER TRANSMISSION AUTHORITY**

MEMORANDUM

DATE: November 24, 2009

TO: Distribution

FROM: Marc A. Cannata, Project Manager, Reiss Engineering

SUBJECT: **Addendum No. One, RFP No. 2009-003
Request for Proposal
Wastewater Pump Station Construction and Rehabilitation
Contractor Continuing Services**

This Addendum is being issued to provide information as a result of written questions received prior to the non-mandatory pre-bid meeting.

Question: The RFP package requires Proof of ability to meet bonding requirements (i.e., payment and performance bonds) What type of proof is needed and what are the actual requirements?

Answer: *The proof of ability to meet bonding requirements can be done with a notarized or certified letter from your bonding company stating their Company rating, bonding agent, contact person, contact information, bonding capacity, single project limit and percent (%) of bonding capacity currently committed,. Any future projects awarded under this contract will require a Performance Bond and Payment Bond (covering 100% of Project Costs).*

Question: What are the bonding requirements?

Answer: *Once the contractors are selected and the Lakes of Aloma Pump Station Rehabilitation Project is awarded then a Performance Bond and Payment Bond (covering 100% of Project Costs) is required and any future project would have the same requirements.*

Question: What is the engineer's cost estimate for the Lakes of Aloma Pump Station Rehabilitation?

Answer: *The engineer's estimated cost is \$139,619.*

Question: Could you advise as to the number of contractors the Authority intends on short listing for the continuing services? If this is a multiple number I assume each contract will be handled on a per basis with each contractor submitting a proposal?

Answer: *As stated in the RFP Package, the Authority anticipates selecting up to two firms for award of this continuing contract, but reserves the right to alter this number based upon the quality of the submittals received in response to this RFP. The Authority intends to award up to two Continuing Services Contracts with contract terms of one year, which may be extended by mutual agreement of the Authority and Contractor for up to three additional one-year terms. After the selected contractors have been determined, the contract will be handled on a per project basis for any future projects with contractors providing a proposal consistent with their unit price proposal.*
