2008 SCHOLARSHIPS AWARDED BY REISS ENGINEERING

Orlando, FL - Reiss Engineering, Inc. Is pleased to announce the result of our recent 2008 Civil and Environmental Engineering Scholarship selection process for the 2008 Civil academic year. Stacey Smich and Alyson Bryne have been chosen as the 2008 REI Scholarship Recipients.

STACEY SMICH

Stacey Smich is an Orlando native pursuing her undergraduate degree in civil engineering at the University of Florida. She will be graduating December 2009 with her Bachelors in civil engineering. Stacey is also an active technical bridge team member of the ASCE (American Society of Civil Engineers). She has also applied for an individual research project sponsored by the College of Engineering. This project would involve creating a device that utilizes solar energy to extract potable water from the air Stacey has shown that her dedication will enable her to accomplish all of her goals. She is a devoted mother of two children, and she has proven to herself and her professors that she is capable of excelling in college while also caring for her two children. Her commitment, hard work and willingness to succeed are reflected in her outstanding academic achievements and honors and high grade point average. Stacey is a highly driven individual who truly exemplifies that anything is possible if your put you mind to it!

ALYSON BRYNE

Alyson Bryne is currently pursuing her bachelor's degree in environmental engineering at the University of Florida and is expected to graduate this December 2008. She is planning to continue her education by obtaining her master's degree; she will begin taking graduate level courses this fall that are offered as part of a combined degree program at the University of Florida. Alyson has been involved in many organizations throughout her college career and feels that volunteering her time to the community is very important. Through her involvement in these extracurricular activities, Alyson has accomplished many great things. In 2007-08, Alyson was the FWEA (Florida Water Environment Association) President over a capstone design team that won 1st and 2nd place in WEFTEC 2007 and FWRC 2008. Alyson was also actively involved as the Overall Chair in the Dance Marathon where the organization was able to raise an outstanding \$427K for the Children's Miracle Network. As quoted by Alyson, "I feel that it is only proper to give to those that have not been as fortunate." Alyson takes pride in her studies and the organizations she is involved in. Alyson is a true dedicated leader and an individual that sets no boundaries as to what she would like to accomplish in life.

The selection of these students was based on outstanding academic achievement, leadership abilities and future career interests. These scholarships will provide resources for tuition, books or educational supplies required for coursework. The scholarship is renewable for an additional year of study, provided satisfactory scholarship progress is maintained.

REI takes pride in supporting the future environmental leaders of our community. Both Stacey and Alyson embody the values and representative of these scholarships. Please join Reiss Engineering in Congratulating Stacey Smich and Alyson Bryne!

Applications for REI scholarships will be offered again this year to upper level undergraduates and graduates who are majoring in Civil or Environmental Engineering disciplines.

Reiss Engineering, Inc., headquartered in Orlando, remains on of Florida's leading consulting firms specializing in water and wastewater treatment processes. The firm is recognized for its water and wastewater treatment expertise, which includes membrane processes, pilot testing and hydraulic modeling.
